**Viewport on desktop:**  
Approx. 430px wide x 360px high

**Viewport on mobile**  
Approx 300px wide x 250px high

### Image

860px wide x 720px high

### Tips:

- If you would like to include graphical elements on the image slider you can, but aim to centre the important information and leave approx 150px clear space on either side.
- Keep in mind arrows will appear as an overlay on either side of the tile
- We have suggested approximately 860px wide x 720px high for each slider, but any image of the approximate ratio will work
- Create the slider in the ‘sliders’ section. Sliders can be applied to the dynamic template using the header content module. Sliders also appear on a lot of the old templates.
