The AUSCHEM Chemical Users Course (previously called Farm Chemical Users Course) is the industry standard for training in chemical use, storage and handling.

**Entry requirements**
Each student will undertake a Pre Enrolment Review before enrolling to help confirm the proposed course is suitable. It will provide valuable information about an individual’s existing skills and knowledge, language, literacy and numeracy skills and whether the course will help in achieving learning and/or employment goals.

Flexible delivery students must have access to a computer and the internet.

**Job outcome**
The AUSCHEM Chemical Users Program enables students to safely use, store and handle chemicals in the workplace.

Completion of the AUSCHEM Chemical Users Program complies with current Victorian legislation and the training required by DPI Victoria for issue of an Agricultural Chemical Users Permit (ACUP). Completion of this course also complies with current New South Wales legislation and the compulsory training required by the DECC for all unsupervised users of AgVet chemicals. It is a requirement of New South Wales legislation that AgVet chemical users must gain AusChem (Vic) re-accreditation (or equivalent) every 5 years.

**Further study**
The AUSCHEM Chemical Users Program is also a pre-requisite to
undertaking a 1080 Pest Control Course, successful completion would enable participants to obtain a 1080 endorsed ACUP.

Fee
$255.00
